ABOUT FROST

The leader in **entrance and security solutions** in Southern Africa.

Founded in 1970, Frost International is the foremost supplier of entrance and physical security solutions in Southern Africa.

From our early beginnings as a distributor of high-quality revolving doors and security access control products in 1992, Frost International has continuously grown to become a leading provider of Entrance and Security Solutions.

Through exclusive distribution agreements with internationally renowned companies like BOON EDAM, iFUBA HUFCOR, Ferroflex, and MOTION4, we have solidified our position as a specialist contractor in the construction industry.

In 2004, we introduced the FROST AUTOMATIC, the only automatic sliding door operator designed, developed, and manufactured in South Africa by a South African company.

With our extensive expertise, exceptional product range, and dedication to quality, Frost International is well-equipped to provide you with the entrance and physical security solution you require.

Established in 1970

Committed. Responsible. Excellent.

ALWAYS OPEN, ALWAYS CLOSED.

BOON EDAM revolving doors are of the highest quality and are designed for superior aesthetics, ease of use and energy saving.

There are a wide range of door types to suit individual requirements - from small office blocks to large shopping malls and airports.

Frost International is the sole Southern African distributor of the Boon Edam range of products in Southern Africa.

- 24V 100w DC Brushless Motor

EVODRIVE+ SLIMLINE

AUTOMATIC SLIDING DOORS FOR INTERIORS

Frost International have teamed up with MOTION4 to introduce the EvoDrive+ slimline automatic sliding door operator to the South African market.

The EvoDrive+ is a redefinition of the traditional automatic door operator. This unique magnetic linear motor uses an electrically powered to produce a linear force using magnetic fields to create thrust and movement, instead of rotating, which reduces the number of mechanical parts required.

This results in a very compact and stylish aluminium housing, a quieter and smoother motion and a longer lifespan, combining the compact size of a manual door track, with the performance and convenience of a normal automatic sliding door.

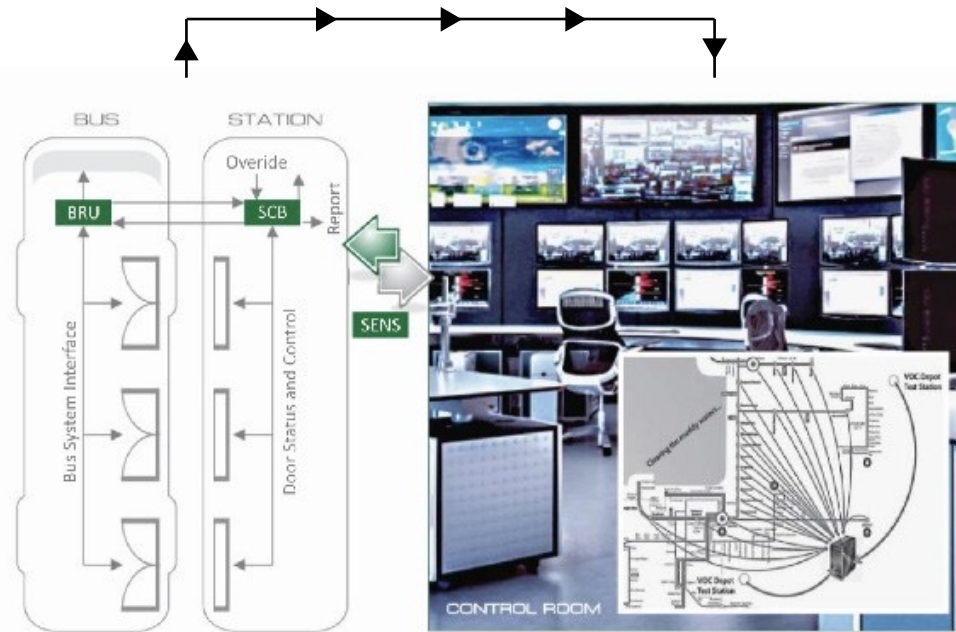

The EvoDrive+ is aesthetic pleasing, silent, safe, highly versatile, and requires low maintenance.

The leader in entrance and security solutions in Southern Africa

STATION INTERFACE SYSTEM

FROST INTERNATIONAL has established itself as the leading solution provider in South Africa for BRT Station Pedestrian Safety Door control, interacting with specific BRT busses and sending relevant information via its proprietary software to the TMC to ensure a smooth and efficient management system.

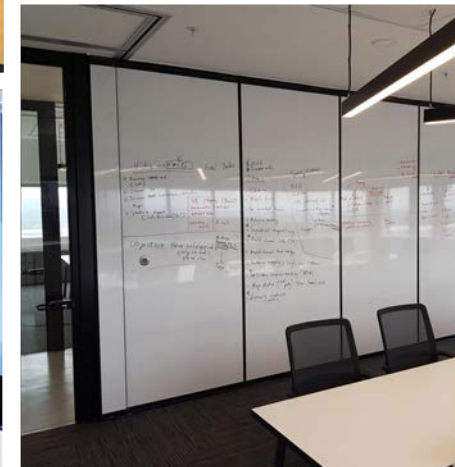

ACOUSTIC OPERABLE WALLS

CONTROL THE SHAPE OF YOUR SPACE

FROST INTERNATIONAL is the sole distributor for IFUBA PRODUCTS in the Western and Southern Cape Regions.

iFUBA HUF COR Walls have a history of quality, reliability, innovation and longevity. For these reasons iFUBA HUF COR Walls are preferred and routinely specified by architects, contractors and engineers globally.
